
EXPERIENCE

Senior Engineering Manager - GoTo

February 2024 - Present

- Leading infrastructure platform organization for GoTo products.
- Managing DevOps engineering teams responsible for cloud-based SaaS platform stability and performance.
- Overseeing incident management processes and escalation procedures.
- Engineering Lead of Central, Pro, and Hamachi products (former LogMeIn).
- Driving technical excellence and team development strategies.

Engineering Manager II - GoTo

October 2022 - January 2024

- Led DevOps team responsible for former LogMeIn products' infrastructure.
- Engineering Lead of Central, Pro, and Hamachi products (former LogMeIn).
- Managed DevOps and product engineering teams supporting cloud-based SaaS development.
- Supported all former LogMeIn products' cloud infrastructure operations and SaaS software development.
- Oversaw incident management with DevOps team and managed escalation processes.

Group Leader - Continental

January 2021 - October 2022

- Managed 31 engineers and interns in Function Development department (built one team from 0 to 12).
- Cooperated with Continental ADAS on R&D initiatives.
- Supported function development of brake systems through software development, requirement analysis, and testing.
- Handled financial planning for department equipment and led department-wide agile transformation.

Team Coordinator / Senior Function Development Engineer - Continental

January 2020 - December 2020

- Provided technical leadership for 15 engineers and interns.
- Offered technical support in requirement engineering, ISO 26262 compliance, and vehicle/simulator testing.
- Managed sprint planning, Scrum, Kanban processes, and resource tracking.
- Conducted requirement engineering including trace, analysis, and ISO 26262 compliance.
- Supported international projects in full life cycle (AUTOSAR C development, documentation, measurement analysis, vehicle testing).
- Actively participated in University of Pannonia cooperation through lecturing and presentations.

Local Package Coordinator - Continental

January 2019 - December 2019

- Provided technical leadership for 20 engineers and interns.
- Delivered technical support in requirements, ISO 26262, and vehicle/simulator testing.
- Managed sprint planning, Scrum/Kanban processes, and resource allocation.

Function Development Engineer - Continental

February 2017 - December 2018

- Performed requirement engineering with trace, analysis, and ISO 26262 compliance.
- Supported international projects in full life cycle with AUTOSAR C implementation, documentation, and measurement analysis.
- Lectured and presented at University of Pannonia partnerships.

Software Developer

August 2015 - February 2017

- Freelance projects for small businesses and university research groups.

EDUCATION

MSc, Computer Science Engineering - University of Pannonia

2018 - 2020

Specialization: Software Systems and Computer Networks.

Thesis: Investigation of the unit commitment problem.

BSc, Computer Science Engineering - University of Pannonia

2014 - 2018

Thesis: Automatic route search with drone.

SKILLS

Engineering & Management:	Engineering Management, People Management, Technical Leadership, Project Management, Agile Methodology, Scrum, Kanban
Cloud & DevOps:	AWS, Azure, Oracle Cloud (OCI), Cloud-based SaaS, DevOps Engineering, CI/CD, Terraform
Software Development:	C++, C#, .NET, Java, Python, AUTOSAR C, SQL
Specialized Skills:	System Design, Requirements Engineering, Incident Management, Data Analysis, ISO 26262, Automotive, Industrial Printers
Tools & Platforms:	Git, GitHub Copilot, Claude Code, Bitbucket, Visual Studio, Qt, Linux, Windows, Debian
Languages:	English (Fluent), Hungarian (Native)
